Profile

Computer Science and Engineering undergraduate at IIIT Bhopal with strong foundations in Data Structures and Algorithms, object-oriented programming, DBMS, operating systems, and computer networks. Skilled in building full-stack web applications and AI-powered systems using React.js, Next.js, Node.js, Express.js, TypeScript, Python, MongoDB, SQL, LLMs, and Agentic AI.

Education

Indian Institute of Information Technology, Bhopal B.Tech, Computer Science and Engineering CGPA: 8.43 Madhya Pradesh, India	2024 – 2028
Modi School, Rajkot Class XII – 90.40% Gujarat, India	2024
Podar International School, Rajkot Class X – 90.60% Gujarat, India	2022

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, SQL

AI/ML & Agentic AI: Machine Learning, LLMs, Agentic AI, AI Agents, Prompt Engineering, Local LLMs, Persistent AI Memory

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Chart.js, NumPy, Pandas, Scikit-learn

Databases & Tools: MongoDB, MySQL, SQLite, Git, GitHub, Postman, VS Code, Jupyter Notebook

Core Concepts: DSA, OOP, DBMS, REST APIs, JWT Authentication, OS, Computer Networks, Data Preprocessing

Projects

Expense Tracker & Finance Dashboard <i>React.js, Vite, Node.js, Express.js, MongoDB, Tailwind CSS, Recharts, JWT</i>	August 2026 GitHub Live Demo
--	-----------------------------------

- Built and deployed a full-stack personal finance management application using the MERN stack for tracking income and expenses.
- Implemented secure JWT-based authentication, protected routes, password hashing, and user-specific data access.
- Developed an interactive financial dashboard with charts, transaction history, income and expense summaries, and responsive UI using Tailwind CSS.

Local AI Agent with Persistent Memory <i>Python, AI/LLM, SQLite, Agentic AI, Local Execution</i> GitHub	August 2026
---	-------------

- Built a local AI agent capable of processing user queries and maintaining persistent conversational memory across sessions.
- Implemented a SQLite-based memory system to store, retrieve, and manage relevant information for context-aware responses.
- Designed an extensible agent architecture combining LLM reasoning, local memory, and tool-based execution for autonomous task handling.

Achievements

- CodeChef:** 2-star programmer with a maximum rating of 1583; secured Global Rank 232 in CodeChef Starters 250.
- Solved 700+ data structures and algorithms problems across LeetCode, Codeforces, and CodeChef, including arrays, trees, graphs, dynamic programming, greedy algorithms, and heaps. Completed 300+ problems from the AlgoMaster DSA sheet, covering interview-focused standard and advanced problem-solving patterns.
- JEE Main 2024:** Secured 98.90 percentile among more than one million candidates and qualified for JEE Advanced 2024.
- Codeforces (Specialist):** Achieved a maximum rating of 1495; secured Global Rank 687 in Codeforces Round 1116 (Div. 2).
